

To find a provider for your dental plan, follow the instructions below.

Contracting providers have agreed to provide services at discounted fees. You may visit a dental provider who does not participate in one of our networks; however, you may be billed for any charges above the maximum allowable limits.

1 Visit **bcidaho.com**. Select **Individual and Family** from the **Members** menu.

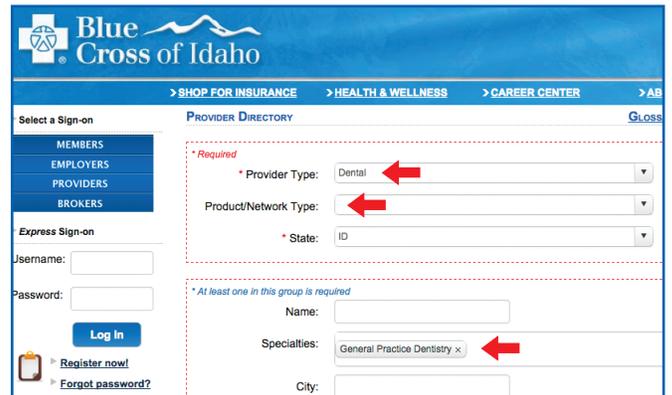

2 Select **Find a Provider Near You** from the **What's New** menu options.

3 Select **Dental** as the **Provider Type** in the top dropdown box.

To find your **Product/Network Type**, take a look at your member ID card. You'll see one of three dental networks: Trad, PPO, or POS. Use the drop down arrow to choose the network associated with your plan.

Enter other search criteria to narrow your search, such as provider name, provider location, or other specialty, then select **Search** at the bottom of the form to view your results.

4 A new page will display your results.
